Performance Options

ClimaTech... your solution for increased window performance.

For maximum energy savings, upgrade your bay, bow and garden windows with a ClimaTech insulating glass package, featuring Low-E glass, argon gas** and the Intercept Warm-Edge Spacer System. The superior thermal performance of this insulating glass unit can help lower your energy costs while further reducing the consumption of fossil fuels. Many ClimaTech insulating glass packages meet the latest ENERGY STAR® requirements. Consult your window professional for the optimal glass package required for your home and climate zone.

Bay, bow and garden windows with ClimaTech may actually exceed the performance requirements set forth by the U.S. Department of Energy in conjunction with the National Fenestration Rating Council (NFRC) test criteria.

One of the most critical NFRC tests measures the rate of heat loss through a window or door (U-Factor). The lower the U-Factor, the better the product is at resisting heat flow, which results in a product with a greater insulating value.

Another critical NFRC test is for Solar Heat Gain Coefficient (SHGC). This procedure measures how well a product blocks heat caused by sunlight. Again, the lower the number, the less solar heat the window transmits into the home.

Low-E glass filters long-wave radiation from the sun. This reduces solar heat gain from the summer sun, helping to keep your

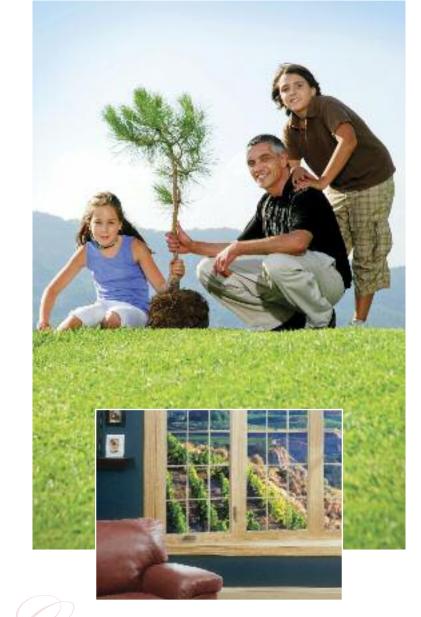

What makes the ClimaTech insulated glass package so effective?

Since 80% of a window is glass, substantial heating and cooling savings come from improved glass performance.

- Our combination of UV-filtering Low-E glass, argon gas and the Intercept Warm-Edge Spacer System dramatically enhances energy efficiency. Together they can cut the damaging effects of the sun, which can lead to the fading of carpets, curtains and furniture, by an additional 72% over clear insulated glass units.
- In winter, a warmer glass temperature is maintained, increasing the R-Value by up to an additional 104%.
- In summer, up to a 49% reduction in solar heat gain helps reduce airconditioning costs.

Alside offers a variety of ENERGY STAR qualified products. Consult your window professional for the optimal glass package required for your home and climate zone.

Go Green

Exceptionally energy-smart and weathertight, Alside Windows not only reduce fuel consumption needed to heat and cool homes, they also boast a long service life and achieve optimal material use and minimal waste in production. Virtually all in-plant vinyl scrap is recycled into other useful products, further reducing the environmental impact of waste. Vinyl windows also are eco-friendly because vinyl resin is derived largely from common salt - a sustainable and abundant natural resource!1

Bay and bow windows help create dramatic new appearances, adding style to the exterior of your home as they expand interior space, light and view.

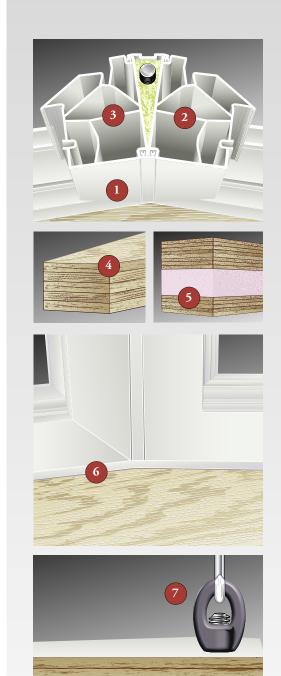

- 1. Vinyl frames and sashes will never chip, peel, crack or warp. Made with premium raw materials, the vinyl color is formulated throughout so the beautiful luster lasts.
- 2. Extruded vinyl frame and sashes help to increase energy efficiency.
- 3. Multi-channel design allows for additional insulation between window units.
- **4.** 1¹/4" furniture-grade veneer is standard in the construction of head, seatboard and jambs.
- 5. 3" pre-insulated seatboard option helps increase energy savings and provides a more comfortable interior.
- 6. Head and seatboard are available in oak or birch veneer finishes and ready for painting or staining.[†]
- 7. Adjustable turn-buckle cable hanging system is designed to eliminate possible sagging or bowing and the need for external braces.

Plus these additional features:

- Slimline reinforced mullion design provides superior strength and support for the selected components.
- Insulated glass unit featuring double-strength glass with optimal air space improves year-round performance.
- Intercept® Warm-Edge Spacer System maximizes thermal efficiency and the life of the insulated glass unit.

Enhance your bay and bow windows with these options:

- ClimaTech® insulated glass package featuring Low-E glass and Intercept Warm-Edge Spacer System, for enhanced insulating performance.
- Full or half fiberglass screens provide ventilation while keeping insects out.
- Bay and bow windows are available in white, beige or classic clay with an optional rich maple, light oak, dark oak, foxwood or cherry woodgrain interior.
- Color-coordinated, maintenance-free interior laminate head and seatboard surface. Available in matching woodgrain interior finishes.

Bay and bow windows
let you change the basic
architectural look of your
home – inside and out. They
open up rooms, making them
seem larger and brighter.

All Alside Bay and Bow Windows are constructed with attention to detail. Strong vinyl frame and sashes ensure durability and ease-of-maintenance. And the interior of every Alside Bay or Bow Window includes a hand-selected oak or birch veneer that's ready for staining or painting. Additional and optional features include:

- 11/4" furniture-grade veneer is standard in the construction of head, seatboard and jambs.
- 3" pre-insulated seatboard option means a more comfortable home and helps increase energy savings.
- Slimline reinforced mullion design provides superior strength and support for the selected components.
- Bay and bow windows are available in white, beige or classic clay with optional rich maple, light oak, dark oak, foxwood or cherry woodgrain interior finishes.
- Color-coordinated, maintenance-free interior laminate options are available in matching woodgrain interior finishes for the head, seat and jambs.
- Exterior roof system available with an optional copper or painted aluminum roof clad kit.
- Available in your choice of double-hung, casements or fixed-lite combinations.
- Alside Bay Windows are available in 3-lite or box style configurations.
- Alside Bow Windows are available in 3-, 4-, 5-, and 6-lite configurations.

Extended Box Window

The expanded view offered by this 5-lite bow window allows a wonderful view to the outdoors (above).

A stately meeting area is enhanced by the architectural addition of this extended box window (above).

- Solid construction features 11/4" oak or birch furniture-grade hardwood veneer.
- Exterior projections available in 7", 9" or 11".
- Configurations may be designed up to 94" in width and 72"
- Available in 1-, 2- and 3-lite models.
- Choose from white, beige or classic clay windows with optional rich maple, light oak, dark oak, foxwood or cherry woodgrain interior finishes.
- Color-coordinated, maintenancefree interior laminate options are available in matching woodgrain interior finishes for the head, seat and jambs.

This bay window, featuring a beveled-leaded glass center fixed-lite, creates a new dimension for this casual living area (above).

Garden Windows: A Bright Showcase

Now you can have fresh flowers or herbs in your home throughout the year, right in the room where they'll bring you the most pleasure.

See for yourself how a garden window brings the outdoors in without sacrificing comfort. On warm, sunny days the fully screened, twin-sealing side vents bring in gentle breezes. The Alside Garden Window will not chip, blister or peel and will never need scraping or painting. The deep 17" seatboard makes a great accent area for your favorite plants and a full 1" insulated glass package offers you added comfort all year-round.

- Fully welded mainframe for strength and stability.
- Top sloped insulating glass panel is tempered for improved safety and unit integrity.
- Equal sightlines between picture units and operating sashes.
- Twin-sealing, fully screened, operating casements improves weather protection.
- Multi-point locking system for a tighter seal and added security.
- Clear 1" insulated glass unit provides all-weather protection.
- An adjustable 1/2" thick glass shelf with polished edges is standard on

Top sloped insulating glass (a constant 35 degrees) is tempered for improved safety and unit integrity.

Completely assembled with head and seatboard for easy installation.

Specially designed, twin-sealing, fully screened, operating casements with external glazing improves weather protection.

Decorative Options

Colors and Finishes
