

# “DIY” CUSTOM FINISHING

WITH PAINTABLE/STAINABLE LAMINATE OPTION

## FINISH YOUR WAY. **PERFORM THE SUNRISE WAY.**

Made from a custom-engineered vinyl, Sunrise's Paintable/Stainable laminate provides the greatest range of customization of any vinyl replacement window. This specialized surface treatment responds to stains and paints the same as natural wood, with the added benefit of vinyl-window-efficiency existing below the surface.

### KEY FEATURES

- **Realistic pine graining** which remains visible through most shades of stain
- **Simple, natural beauty** which can be retained with a coat of water-based varnish
- **Paint to match any decor style** like a traditional wood-window
- **Neutral, Pontiac Gold Hardware** standard, but also available in other decorative finishes
- **Warrantied for a Lifetime\*** against cracking, chipping and rotting of the laminate material itself *(finish not included in the Sunrise warranty as it is being applied in the field and should be warrantied by the finisher)*
- Sunrise Paintable/Stainable laminate is available for the most popular window types, as well as **Sliding Patio Doors** and **Sidelites**.

Please note, printed images may vary from exact product colors and finishes. Please see your Authorized Dealer for exact color and finish samples.

[www.sunrisewindows.com](http://www.sunrisewindows.com)

\*use of improper products or tools during the finishing process will void the warranty; at minimum the laminate must be sealed with a high-quality urethane.

Produced with the greatest attention to detail, the grain pattern of Sunrise's paintable/stainable laminate is made to look like natural, raw pine.

For maximum glass efficiency with traditional "wood-window" styling, add paintable/stainable **Simulated Divided Lites** or **Simulated Meeting Rails**.

(SMRs for casement and awning only)
